MENUi – Hot Fix Installation Document 4.0

## Installation

Hot Fix 4.0 fixes an issue where a user invokes a menu from a command line and then does not allow a user to return to a command line when they try to exit the menu. A list of objects updated can be found in source file #XSRCHF4, member README in library #MENUi.

The steps that are required are as follows:

	1.	Create a save file (SAVF) on the System i using the command: CRTSAVF QGPL/#MENUHF4
	2.	Download the MENUHF4 save file (SAVF) from the <a href="http://www.foursquares.ca">www.foursquares.ca</a> website to C:\ using your favorite web browser.
	3.	FTP the downloaded save file (SAVF) to your System i into library <i>QGPL</i> into the save file # <i>MENUHF4</i> created above.
		<b>**** BE SURE YOU HAVE A BACKUP OF LIBRARY #MENU BEFORE YOU BEGN ****</b>
	4.	Restore the objects in library # <i>MENUHF4</i> using command: RSTOBJ OBJ(*ALL) SAVLIB(#MENUHF4) DEV(*SAVF) SAVF(QGPL/#MENUHF4) MBROPT(*ALL) ALWOBJDIF(*ALL) RSTLIB(#MENU) OUTPUT(*PRINT)
